Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series)

Barbara M. Byrne

Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series) Barbara M. Byrne

Modeled after Barbara Byrne's other best-selling structural equation modeling (SEM) books, this practical guide reviews the basic concepts and applications of SEM using *Mplus* Versions 5 & 6. The author reviews SEM applications based on actual data taken from her own research. Using non-mathematical language, it is written for the novice SEM user. With each application chapter, the author "walks" the reader through all steps involved in testing the SEM model including:

- an explanation of the issues addressed
- illustrated and annotated testing of the hypothesized and post hoc models
- explanation and interpretation of all *Mplus* input and output files
- important caveats pertinent to the SEM application under study
- a description of the data and reference upon which the model was based
- the corresponding data and syntax files available at <http://www.psypress.com/sem-with-mplus/datasets> .

The first two chapters introduce the fundamental concepts of SEM and important basics of the *Mplus* program. The remaining chapters focus on SEM applications and include a variety of SEM models presented within the context of three sections: Single-group analyses, Multiple-group analyses, and other important topics, the latter of which includes the multitrait-multimethod, latent growth curve, and multilevel models.

Intended for researchers, practitioners, and students who use SEM and *Mplus*, this book is an ideal resource for graduate level courses on SEM taught in psychology, education, business, and other social and health sciences and/or as a supplement for courses on applied statistics, multivariate statistics, intermediate or advanced statistics, and/or research design. Appropriate for those with limited exposure to SEM or *Mplus*, a prerequisite of basic statistics through regression analysis is recommended.

From reader reviews:

Ismael Roop:

Nowadays reading books become more and more than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The info you get based on what kind of reserve you read, if you want drive more knowledge just go with schooling books but if you want really feel happy read one together with theme for entertaining for instance comic or novel. The Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series) is kind of reserve which is giving the reader unforeseen experience.

Jake Harris:

Hey guys, do you wishes to finds a new book you just read? May be the book with the name Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series) suitable to you? Often the book was written by well known writer in this era. Often the book untitled Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series) is one of several books this everyone read now. This book was inspired a lot of people in the world. When you read this e-book you will enter the new dimensions that you ever know prior to. The author explained their concept in the simple way, and so all of people can easily to know the core of this e-book. This book will give you a lots of information about this world now. To help you see the represented of the world with this book.

Billy Taylor:

Playing with family in the park, coming to see the coastal world or hanging out with good friends is thing that usually you have done when you have spare time, and then why you don't try point that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series), you are able to enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't obtain it, oh come on its known as reading friends.

Colton Fierros:

Is it anyone who having spare time in that case spend it whole day by watching television programs or just telling lies on the bed? Do you need something totally new? This Structural Equation Modeling with Mplus: Basic Concepts, Applications, and Programming (Multivariate Applications Series) can be the response, oh how comes? The new book you know. You are therefore out of date, spending your time by reading in this new era is common not a nerd activity. So what these publications have than the others?
