Oncology: Hepatocellular Carcinoma (Audio-Digest Foundation Oncology Continuing Medical Education (CME). Book 2) Audio Digest

Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners – physicians and other healthcare professionals – with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice.

Audio-Digest Oncology is specifically designed to provide the participant with up-to-date and accurate information on areas of competency as identified by the ABIM Medical Oncology MOC Examination Blueprint and ASCO's Core Curriculum Outline. Topics include, but are not limited to, the following:

The 37 cancer types and sites

Treatment regimens and methods, including chemotherapy, radiation therapy, hormonal therapies, and biological response modifiers

Other treatment-related issues, including oncological emergencies, paraneoplastic syndrome, bone marrow transplantation, local therapy of metastatic cancers, and management of malignant effusions

Complications, including infections and other complications of treatment; effects of disease and treatment on the patient, including psychosocial and psychological issues

Supportive care, including pain management, hematopoietic growth factors, transfusion therapy, nutritional support, end-of-life care, etc.

Procedures, including chemotherapy administrations, tumor assessment, bone marrow aspiration, biopsy and interpretation

Geriatric oncology

The goal of this program is to improve the management of hepatocellular carcinoma (HCC). After hearing and assimilating this program, the clinician will be better able to:

- 1: Recommend mandatory screening for those patients considered to be at high risk.
- 2: Utilize an algorithm for the diagnosis and treatment of HCC.
- 3: Optimize patient selection for each of the treatment strategies.
- 4: Elaborate on the use of sorafenib as a treatment option.
- 5: Discuss the indications, contraindications, and complications of radiofrequency ablation, chemoembolization, and radioembolization.
