Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE

Morten Tolstrup

Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE Morten Tolstrup
Why is indoor coverage needed, and how it is best implemented? As the challenge of providing higher data speeds and quality for mobile applications intensifies, ensuring adequate in-building and tunnel coverage and capacity is increasingly important.

A unique, single-source reference on the theoretical and practical knowledge behind indoor and tunnel radio planning, *Indoor Radio Planning, Second Edition* provides an overview of mobile networks systems and coverage solutions with GSM, UMTS, HSPA and LTE cellular systems technologies as a backdrop.

All of the available solutions, from basic passive distributed antenna systems (DAS) through to advanced fiber optic systems supporting MIMO and LTE, are discussed in detail to give the reader a good understanding. In addition, there is a section covering multi-operator systems, as this becomes a more and more utilized approach. Systematically moving from the basic considerations through to advanced indoor planning, aspects such as upgrading passive DAS from 2G to 3G, noise analysis, link budgets, traffic calculations and software tools that can be used to help create in-building designs are also covered. Femtocells, outdoor DAS and tunnel radio planning are newly included in this edition. A new version of the bestseller, updated with an introduction to LTE and treatments of modulation principle, DAS systems for MIMO/LTE, designing repeater systems and elevator coverage Addresses the challenge of providing coverage inside train, and high speed rail Outlines the key parameters and metrics for designing DAS for GSM, DCS, UMTS, HSPA & LTE Essential reading for engineering and planning personnel at mobile operators, also giving a sound grounding in indoor radio planning for equipment manufacturers Written by a leading practitioner in the field with more than 20 years of practical experience

From reader reviews:

Diana Ham:

The book Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE make one feel enjoy for your spare time. You can utilize to make your capable much more increase. Book can being your best friend when you getting tension or having big problem with your subject. If you can make reading a book Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE being your habit, you can get considerably more advantages, like add your personal capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like start and read a e-book Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE. Kinds of book are several. It means that, science guide or encyclopedia or other people. So , how do you think about this guide?

Edith Ward:

Book is to be different for every grade. Book for children until finally adult are different content. As it is known to us that book is very important for people. The book Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE ended up being making you to know about other understanding and of course you can take more information. It is quite advantages for you. The guide Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE is not only giving you much more new information but also for being your friend when you feel bored. You can spend your current spend time to read your publication. Try to make relationship while using book Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE. You never truly feel lose out for everything if you read some books.

James Chavez:

Do you among people who can't read pleasurable if the sentence chained inside the straightway, hold on guys this specific aren't like that. This Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE book is readable simply by you who hate those straight word style. You will find the details here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to give to you. The writer of Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE content conveys objective easily to understand by most people. The printed and e-book are not different in the content but it just different in the form of it. So , do you still thinking Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE is not loveable to be your top checklist reading book?

Amy Gutierrez:

Many people spending their time frame by playing outside together with friends, fun activity together with family or just watching TV all day long. You can have new activity to spend your whole day by reading a book. Ugh, do you think reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, having everywhere you want in your Smart phone. Like Indoor Radio Planning: A Practical Guide for GSM, DCS, UMTS, HSPA and LTE which is getting the e-book version. So , try out this

book? Let's notice.
