Many organizations are scrambling to prepare for an expected wave of retirements. Almost twice as many job openings are occurring from people retiring as from economic expansion—a direct function of a steadily aging workforce. The implications for businesses, government agencies, nonprofits, and educational institutions are enormous, as organizational leaders maneuver to fill the talent pipeline. In this context, organizations are stepping up their investments in career planning (training and development programs to help employees hone their skills and qualify for advancement) and succession management (programs designed to ensure the continuity of leadership). To date, however, these programs have generally been treated in isolation.

Drawing from a survey of 1,000 human resource practitioners and a wide variety of case examples, the authors demonstrate how to create that crucial link between succession and career development programs—developing one's organization's talent from the bottom up and the top down simultaneously. Featuring numerous diagnostics, checklists, and other interactive elements, *Career Planning and Succession Management* will become an indispensable guide for leaders and human resource professionals looking to align individual and organizational goals and ensure their economic future.

Showcasing the most current theory and practice, the book address such hot-button issues as: how to prevent top performers from leaving, how to balance the competing needs of promoting from within versus bringing in new blood, and dealing with unexpected retirements in an age of corporate scandal. Featuring numerous diagnostics, checklists, and other interactive elements, *Career Planning and Succession Management* will become an indispensable guide for leaders and human resource professionals looking to align individual and organizational goals and ensure their economic future.
