Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology)

Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology)

Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology)

Building on the breakthrough text *Philosophy and Engineering: An Emerging Agenda,* this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering, along with a series of critical reflections by engineering practitioners. The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering methods, design and education.

The volume is divided into reflections on practice, principles and process, each of which challenges prevalent assumptions and commitments within engineering and philosophy. The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving. Above all, the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides.

The chapters in this volume are from a diverse and international body of authors, including philosophers and engineers, and represent a highly select group of papers originally presented in three different conferences. These are the 2008 Workshop on Philosophy and Engineering (WPE-2008) held at the Royal Academy of Engineering; the 2009 meeting of the Society for Philosophy and Technology (SPT-2009) at the University of Twente in the Netherlands; and the Forum on Philosophy, Engineering, and Technology (fPET-2010), held in Golden, Colorado at the Colorado School of Mines.

From reader reviews:

Joshua Matthews:

Now a day folks who Living in the era just where everything reachable by match the internet and the resources within it can be true or not need people to be aware of each information they get. How many people to be smart in receiving any information nowadays? Of course the reply is reading a book. Reading through a book can help people out of this uncertainty Information mainly this Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology) book as this book offers you rich information and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it as you know.

Rosie Zimmerman:

Nowadays reading books become more and more than want or need but also be a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge your information inside the book which improve your knowledge and information. The details you get based on what kind of publication you read, if you want get more knowledge just go with education books but if you want sense happy read one having theme for entertaining including comic or novel. The actual Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology) is kind of guide which is giving the reader capricious experience.

Kathryn Hill:

Within this era which is the greater particular person or who has ability in doing something more are more treasured than other. Do you want to become certainly one of it? It is just simple method to have that. What you have to do is just spending your time little but quite enough to get a look at some books. On the list of books in the top listing in your reading list will be Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology). This book that is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking right up and review this guide you can get many advantages.

Marjorie Calhoun:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is published or printed or created from each source that filled update of news. Within this modern era like currently, many ways to get information are available for you actually. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Philosophy and Engineering: Reflections on Practice, Principles and Process (Philosophy of Engineering and Technology) when you desired it?
