Quantum Physics, Near Death Experiences, Eternal Consciousness, Religion, and the Human Soul

William Joseph Bray

Written by a Physicist with 20 years in Neuro-science Medical Research who has experienced numerous medically documented NDEs. The book describes how and why reality, this Universe, is interdependent with consciousness in order to exist. Beginning with the founders of Quantum Physics, Bray describes in detail how we interact with, manipulate and define the finite Universe. We “Paint the Universe into Being”, as Bray says based on the hard data which has been proven as correct through a century of quantum research. Contrary to the concepts of many physicists and neuroscientists who consider consciousness as emerging from the physical brain, Bray describes consciousness creates the physical brain which being finite, ends, while consciousness remains. This consciousness is unique for each individual and will remain so. He also identifies in philosophy and religion the truths that are permanent through centuries, if you extract them from myth and dogma. Through this, many paradoxes in physics, religions and philosophy are eliminated. Bray shows that contrary to cognitive belief systems which change day by day, Faith is being aware that one exists as a tangible, unique and real infinite being in an eternal consciousness in which we totally focus when we die, or when we have a Near Death Experience. He has studied it not only as a physicist and neuroscientist, but as a unique experiencer: he is a rarity who has had many near-death experiences, many medically documented, due to an unknown medical condition which caused his death many times. He also proves through physics how our consciousness must be eternal in order to exist. In fact, even while we are experiencing this short, finite, physical life, we are at the same time existing in the eternal consciousness, only that we are not aware of it, because we are focusing in this finite Universe observation. The purpose is not to “prove” God, but to show that each of us is a unique individual consciousness that exists beyond space-time, for infinity. The book is not going to be ‘easy’ to read, so don’t expect it to be so. You will probably need to read it more than once. The text is high work-high payoff. There are no ‘claims’ or ideological arguments that are not backed up with solid mathematical axioms and unambiguous empirical data that is not open to speculation. The subjects covered are those listed in the title. The text: Teaches the subject of Quantum Physics to the lay reader in math and terminology that is simple to understand. describes how and why reality, this Universe is interdependent with consciousness in order to exist, as defined by the founders of Quantum Physics over half of a century ago, to describe this mechanism in detail, how we interact with, manipulate, and define this finite Universe. To describe how we ‘Paint the Universe into Being’ in a tangible argument, without metaphor, ambiguity, or uncertainty that is suitable within the formal definitions of Quantum Physics as well as the philosophies and Religions of Man. To present a working definition for consciousness that is suitable to the formal definitions of Quantum Physics as well as the philosophies and Religions of Man. To establish that this definition for consciousness requires infinite, unique existence. To define perception employing a unique definition for consciousness that requires infinite existence in order to truly exist. This unique definition for consciousness states that consciousness cannot reside within the limited confines of this finite reality as it has been misunderstood to be, and as such, has evaded being properly defined. Finding this definition was the hope of the founders of Quantum Physics in order to complete a model that describes a universe interdependent on our existence. This is not an ideological argument or exploration. This book very strongly disagrees with most everything written to date, and will bring about contention.
