Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) Millennium Ecosystem Assessment

Humans have changed ecosystems more rapidly and extensively in the last 50 years than in any comparable period of human history. We have done this to meet the growing demands for food, fresh water, timber, fiber, and fuel. While changes to ecosystems have enhanced the well-being of billions of people, they have also caused a substantial and largely irreversible loss in diversity of life on Earth, and have strained the capacity of ecosystems to continue providing critical services.

Among the findings:

Approximately 60% of the services that support life on Earth are being degraded or used unsustainably. The harmful consequences of this degradation could grow significantly worse in the next 50 years.

Only four ecosystem services have been enhanced in the last 50 years: crops, livestock, aquaculture, and the sequestration of carbon.

The capacity of ecosystems to neutralize pollutants, protect us from natural disasters, and control the outbreaks of pests and diseases is declining significantly.

Terrestrial and freshwater systems are reaching the limits of their ability to absorb nitrogen.

Harvesting of fish and other resources from coastal and marine systems is compromising their ability to deliver food in the future.

Richly illustrated with maps and graphs, Current State and Trends presents an assessment of Earth's ability to provide twenty-four distinct services essential to human well-being. These include food, fiber, and other materials; the regulation of the climate and fresh water systems; underlying support systems such as nutrient cycling; and the fulfillment of cultural, spiritual, and aesthetic values. The volume pays particular attention to the current health of key ecosystems, including inland waters, forests, oceans, croplands, and dryland systems, among others. It will be an indispensable reference for scientists, environmentalists, agency professionals, and students.

From reader reviews:

Robert Zamora:

The book Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series)? Wide variety you have a different opinion about e-book. But one aim in which book can give many info for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or data that you take for that, you can give for each other; you are able to share all of these. Book Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) has simple shape nevertheless, you know: it has great and massive function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

Mary Stock:

Here thing why this Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) are different and reliable to be yours. First of all reading through a book is good however it depends in the content from it which is the content is as delicious as food or not. Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) giving you information deeper and in different ways, you can find any reserve out there but there is no reserve that similar with Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series). It gives you thrill reading through journey, its open up your personal eyes about the thing that happened in the world which is maybe can be happened around you. You can easily bring everywhere like in area, café, or even in your means home by train. If you are having difficulties in bringing the imprinted book maybe the form of Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) in e-book can be your alternative.

Doris Blair:

The book untitled Ecosystems and Human Well-Being: Current State and Trends: Findings of the Condition and Trends Working Group (Millennium Ecosystem Assessment Series) contain a lot of information on it. The writer explains your girlfriend idea with easy way. The language is very easy to understand all the people, so do not worry, you can easy to read the item. The book was written by famous author. The author provides you in the new time of literary works. You can actually read this book because you can read on your smart phone, or product, so you can read the book inside anywhere and anytime.
