**New Foundations for a Science of Text and Discourse: Cognition, Communication, and the Freedom of Access to Knowledge and Society (Publications in Creativity Research) (v. 61)** Robert de Beaugrande

A magnum opus in the now vast domain of discourse studies, whose history, methods, and subdomains nobody knows as well as Robert de Beaugrande. No other book in the humanities and social sciences today integrates such encyclopedic knowledge into a thoroughly transdisciplinary, international, intercultural, and critical program. For all advanced students of discourse, this book should be their major mentor, guide, and compendium of research.

-Teun A. van Dijk, University of Amsterdam and Editor of the journals Text and Discourse and Society

- Professor de Beaugrande has been one of the most influential scholars in text linguistics since he helped to found it as a discipline. He commands a large panorama of knowledge and brings this learning to bear on a variety of topics, giving fresh insights and new dimensions. In his latest book, he ranges over linguistic, educational, and cultural disciplines in order to synthesize an important framework within which text and discourse can be understood in new ways.

-John Sinclair, Birmingham University and Editor-in-Chief of Collins COBUILD English Language Dictionary
