Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

As coastal environments around the world face unprecedented natural and anthropogenic threats, advancements in the technologies that support geospatial data acquisition, imaging, and computing have profoundly enhanced monitoring capabilities in coastal studies. Providing systematic treatment of the key developments, **Remote Sensing of Coastal Environments** brings together renowned scholars to supply a clear presentation of the state-of-the-art in this technically complex arena.

Edited by a recipient of the prestigious PECASE award, this book provides unrivaled coverage of the issues unique to coastal environments. It presents the best available data for measuring and monitoring coastal zones and explains how decision makers and resource managers can use this data to address contemporary issues in coastal zone management. The text illustrates the latest developments in active remote sensing, hyperspectral remote sensing, high spatial resolution remote sensing, the integration of remote sensing and *in situ* data, and covers the effects of land-cover and land-use change on coastal environments.

Complete with representative case studies, this authoritative resource provides a timely snapshot of the wide range of remote sensing applications in coastal issues to enhance the understanding of how increasing disturbances to our coastal regions are affecting the ecological dynamics, biological diversity, and ecosystem health of our coastal environments.

From reader reviews:

Tonya Sewell:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite reserve and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the publication entitled Remote Sensing of Coastal Environments (Remote Sensing Applications Series). Try to stumble through book Remote Sensing of Coastal Environments (Remote Sensing Applications Series) as your close friend. It means that it can for being your friend when you sense alone and beside those of course make you smarter than before. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know every little thing by the book. So , let me make new experience and also knowledge with this book.

Jane Rich:

What do you consider book? It is just for students because they're still students or the idea for all people in the world, the particular best subject for that? Simply you can be answered for that issue above. Every person has several personality and hobby for each other. Don't to be pushed someone or something that they don't would like do that. You must know how great and important the book Remote Sensing of Coastal Environments (Remote Sensing Applications Series). All type of book would you see on many solutions. You can look for the internet solutions or other social media.

Dale Vaught:

Nowadays reading books are more than want or need but also be a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The details you get based on what kind of publication you read, if you want attract knowledge just go with knowledge books but if you want sense happy read one with theme for entertaining for example comic or novel. Typically the Remote Sensing of Coastal Environments (Remote Sensing Applications Series) is kind of guide which is giving the reader unpredictable experience.

Rosario Jones:

In this period of time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you is Remote Sensing of Coastal Environments (Remote Sensing Applications Series) this publication consist a lot of the information with the condition of this world now. This book was represented how can the world has grown up. The words styles that writer use for explain it is easy to understand. Often the writer made some exploration when he makes this book. Honestly, that is why

this book suited all of you.
