Gerald Edelman

Neural Darwinism: The Theory Of Neuronal Group Selection Gerald Edelman

Already the subject of considerable pre-publication discussion, this magisterial work by one of the nation's leading neuroscientists presents a radically new view of the function of the brain and nervous system. Its central idea is that the nervous system in each individual operates as a selective system resembling natural selection in evolution, but operating by different mechanisms. By providing a fundamental neural basis for categorization of the things of this world it unifies perception, action, and learning. The theory also completely revises our view of memory, which it considers to be a dynamic process of recategorization rather than a replicative store of attributes. This has deep implications for the interpretation of various psychological states from attention to dreaming. *Neural Darwinism* ranges over many disciplines, focusing on key problems in developmental and evolutionary biology, anatomy, physiology, ethology, and psychology. This book should therefore prove indispensable to advanced undergraduate and graduate students in these fields, to students of medicine, and to those in the social sciences concerned with the relation of behavior to biology. Beyond that, this far-ranging theory of brain function is bound to stimulate renewed discussions of such philosophical issues as the mind-body problem, the origins of knowledge, and the perceptual basis of language.

From reader reviews:

Joy Hanson:

Have you spare time for a day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a walk, shopping, or went to the particular Mall. How about open or read a book entitled Neural Darwinism: The Theory Of Neuronal Group Selection? Maybe it is to be best activity for you. You understand beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have additional opinion?

Noah Giles:

What do you concerning book? It is not important to you? Or just adding material if you want something to explain what you problem? How about your extra time? Or are you busy person? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everybody has many questions above. They have to answer that question simply because just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this kind of Neural Darwinism: The Theory Of Neuronal Group Selection to read.

Patricia Steele:

Information is provisions for individuals to get better life, information currently can get by anyone with everywhere. The information can be a knowledge or any news even a problem. What people must be consider whenever those information which is from the former life are challenging be find than now's taking seriously which one is acceptable to believe or which one the resource are convinced. If you have the unstable resource then you get it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Neural Darwinism: The Theory Of Neuronal Group Selection as the daily resource information.

Jeffrey Diaz:

In this time globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher that print many kinds of book. The actual book that recommended for your requirements is Neural Darwinism: The Theory Of Neuronal Group Selection this guide consist a lot of the information from the condition of this world now. This particular book was represented how do the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. The writer made some analysis when he makes this book. That is why this book appropriate all of you.
