You'll learn to creatively combine layers, animate eye-catching titles, manipulate 3D space, track or rotoscope existing footage to add new elements, color key and stabilize a shot to place it in a new environment, and use effects to generate excitement or enhance the realism of a scene. Easy to follow, step-by-step instructions guide you through the features, with explanations of the "why" instead of just the "how" behind each technique. You'll learn more than just the tools; you'll learn skills that you can immediately put to work expressing your own ideas in your productions. Topics include how to: Animate, edit, layer, and composite video and still images. Manipulate keyframes and the way they interpolate to create more refined animations. Use masks, mattes, stencils and blending modes to add sophistication to your imagery. Create and animate text and shape layers. Place your layers in 3D space. Use tracking and keying to create special effects, such as replacing screen displays.
