More than 150 cases help you develop the problem-solving and decision-making skills necessary to succeed in real-world clinical practice

Pharmacotherapy Casebook provides the case studies you need to learn how to identify and resolve drug therapy problems you're most likely to encounter in real-world practice.

This new edition is packed with 157 patient cases and makes the ideal study companion to the eighth edition of DiPiro's *Pharmacotherapy: A Pathophysiologic Approach*. The case chapters in this book are organized into organ system sections that correspond to those of the DiPiro textbook. By reading the relevant chapters in *Pharmacotherapy: A Pathophysiologic Approach* you will be able to familiarize yourself with the pathophysiology and pharmacology of each disease state included in this casebook.

Everything you need to develop expertise in pharmacotherapy decision making:

- Realistic patient presentations include medical history, physical examination, and laboratory data, followed by a series of questions using a systematic, problem-solving approach
- Compelling range of cases – from the uncomplicated (a single disease state) to the complex (multiple disease states and drug-related problems)
- Diverse authorship from more than 190 clinicians from nearly 100 institutions
- Coverage that integrates the biomedical and pharmaceutical sciences with therapeutics
- Appendices containing valuable information on pharmacy abbreviations, laboratory tests, mathematical conversion factors, anthropometrics, and complementary and alternative therapies
