**Reconciliation of Geometry and Perception in Radiation Physics (Focus)** Benoit Beckers, Pierre Beckers  
*Reconciliation of Geometry and Perception in Radiation Physics* approaches the topic of projective geometry as it applies to radiation physics and attempts to negate its negative reputation. With an original outlook and transversal approach, the book emphasizes common geometric properties and their potential transposition between domains. After defining both radiation and geometric properties, authors Benoit and Pierre Beckers explain the necessity of reconciling geometry and perception in fields like architectural and urban physics, which are notable for the regularity of their forms and the complexity of their interactions.
